What is Road Machinery ?

Road machinery is road equipment that used in road construction, paving, manufacturing aggregates for road building, maintaining roads etc. purposes. Road construction machinery is reliable and outstanding invention assist in fulfill our promise to above construction engineer's expectations.

Road Construction Equipment

Generally known as road equipment is a machine that involves in many road projects either construction of new road, road re-cement or just small road repairs. The variety of machinery we offers, which are used depending on vary uses its applications in construction.

Asphalt Road Equipment

- ❖ Capacity: 40 to 150 TPH or As per client need
- ❖ Produces: Hot Mix Asphalt, Concrete, Cold Mix Asphalt
- ❖ Available Type : Drum Type, Batch Type

Skid Mounted Bitumen Sprayer

Skid mounted bitumen sprayer is most preferable bitumen pressure distributor which is used to constant and recommended quantity tack coat applying during road construction. It is accessorized with bitumen tank used for store hot mix asphalt, bitumen or emulsion.

Asphalt Drum Mix Plant

Asphalt drum mix plant is drum type mixer machine used to produce equal mixture of hot mix asphalt generally known as bitumen or asphalt is a key element in road construction. It is ideal choice for constructors who have time constraint to build road.

Our Products

- ❖ Soil Stabilizer Machine
- ❖ Mobile Road Cleaner
- ❖ Road Construction Machine
- ❖ Road Marking Machine
- ❖ Trolley Mounted Bitumen Sprayer
- ❖ Hydraulic Broomer Machine
- ❖ Asphalt Batching Plant
